Exercise 1 Carefully consider our feedback on the language and contents of your proposal, and make the necessary modifications. If appropriate, come and discuss with us. Then upload a new version to the Wiki (with a new filename) and add a new link at the end of the line with your project.

Remember that it is not important that you cover a lot of material, it is the quality of your work that is of utmost importance. In particular, this applies to your presentation, so please allocate sufficient time for its preparation. We will talk more about presentations in the next lecture.

You should come and discuss with us the progress of your project at least once. If you do not experience any major problems while working on your project, come when you have completed a fair part of what you wanted to achieve. This should happen no later than the Friday of the week before your presentation. Of course, if you have problems or questions, you can come and discuss any time.
