Mid-Term Course Evaluation
complete until Monday, December 12th, 9am

Here is a first opportunity to give us feedback on the course as you experienced it so far. Please fill out the corresponding evaluation form using EVA2, the computer science department’s electronic course evaluation tool. Here is the URL and your personal key:

Please see one of us to get a sheet with a personal key

Please take your time for this (there will be no other exercises this week), and be as concrete and constructive as you can. Note that written comments are more useful for us than marks.
