Exercise Sheet 10

complete until Tuesday, January 11th, 2005

Exercise 0

eThink of an idea for a small research project and write oneorton without paragraphs about it on the wiki. It can be anything related to what we have done in this seminar. An experiment, a theoretical analysis, any combination of these or whatever. Try to be creative! In the new year we will discuss these ideas with you and then one of the next exercises will be to write a short research proposal. Where you make your goals and plans more precise!

Have a very nice holiday!

We wish you a merry Christmas and a happy new year!
